

Solutions to move more grain – more ways, more easily

**Build grain handling systems
to meet your needs today.
And tomorrow.**

UFA Grain Solutions (formerly Stirton Betker), provides grain management systems to help increase the efficiency of your operation. We offer conveying systems, grain loops, bins, dryers and computer software that make loading and off-loading grain easier – with a sole operator. We can help you re-evaluate your current set-up, map out a vision for growth, and build a grain management system that will be efficient both now and in the future.

 Grain Solutions

Make your grain management system work more efficiently

Improve grain management on your operation with help from UFA Grain Solutions (formerly Stirton Betker). We have decades of experience working to improve grain management for agriculture production. We offer:

- Open or closed conveying systems that move large volumes of grain easily and efficiently
- Grain loops and computer software that simplify loading and off-loading grain in any direction
- Bins, aeration, drying and installation services to meet the exact requirements of your operation
- Strategies to maximize the efficiency of your existing grain storage system
- The flexibility to expand and change with your operation
- Long-term and multi-phased plans rather than short-term solutions
- Forward thinking systems and solutions to manage your business needs over time

Your partner in productivity.

Guided by your vision and supported by our capabilities, rest assured your agriculture project will be built for success. We offer high quality equipment and supplies, plus a complete range of local resources, connections and expertise to ensure your project gets built right and on time.

UFA is committed to the needs of agriculture. We have the capability and expertise to build almost any type of agriculture structure or system you need – while encouraging your involvement and ideas.

In partnership, we offer:

- Efficient solutions and customized modification through design and installation of turn-key operations
- On-staff industry experts in design, engineering, project management and installation
- The UFA network and supply chain – all the benefits of a province-wide organization, including local access to lumber yards, supply stores, fuel and lubricants, tanks, etc.
- Strict adherence to environmental/safety standards via COR designation and the use of high efficiency building materials
- Quality sub-contractors plus highly-advanced maintenance and service groups
- After-hours parts and service to keep your business up and running

Your project, our expertise.

UFA Grain Solutions will help build your project successfully with the support of high quality equipment and supplies, combined with our superior experience and attention to detail.
