

2019 Syngenta Partner Program

Visivio Bonus - Western Canada

2019 Partner Program Visivio Bonus*

- › Growers who purchase canola seed treated with Visivio™ will receive \$1.50/ac on their canola seed acres treated with Visivio.
- › For the purposes of calculating the Visivio Bonus, it is assumed that a 22.7 kg bag of canola seed will cover 10 acres.
- › Grower must purchase a minimum of \$25,000 of combined eligible and builder products to qualify for the Visivio Bonus.

*This offer is part of the 2019 Syngenta Partner Program and therefore the qualification requirements and the rules and regulations will apply.

Save \$1.50/acre

All 2019 Partner Program™ purchases must be made between November 1, 2018 and October 31, 2019.

Visivio seed treatment represents the next evolution of flea beetle control, offering canola growers a comprehensive solution for flea beetles, as well as seed- and soil-borne diseases. With a powerful combination of insecticides and fungicides, Visivio effectively controls striped and crucifer flea beetles and protects against a broad spectrum of seed- and soil-borne diseases, including *Rhizoctonia*, *Pythium*, *Fusarium*, seed-borne Blackleg and seed-borne *Alternaria*.

A study¹ conducted in 2007, 2008 and 2011 concluded striped flea beetle is now a frequently encountered flea beetle in most geographies of the Canadian Prairies.

Visivio in the Field - 47 sites across Western Canada from 2015 – 2017

| Visivio Average Yield (bu/ac) | Helix® Vibrance® Average Yield (bu/ac) | Average Yield Benefit of Visivio (bu/ac) |
|-------------------------------|--|--|
| 45.1 | 43.5 | 1.6 |

Performance evaluations are based on field observations and Syngenta field trial data over a limited geography and time. Data from multiple years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions.
